NUMAX

Battery Box

Now you can connect all of your 12 volt accessories, quickly, easily and safely. The Numax Battery Box, made from impact resistant polypropylene, accommodates all batteries up to 356mm (L) x 208mm (W) x 228mm (H), keeping you and your clothes away from potentially hazardous battery acid.

BATTERY BOX *deluxe*

- **Battery Power Meter**
Avoid being stranded with a flat battery, at the touch of a button the meter indicates the battery condition.
- **Accessory socket**
Convenient for all 12V accessories. Plugs directly into the battery box.
- **External terminals**
No tools required when connecting or disconnecting equipment. Easier, safer and prevents power leak when not in use.
- **Battery box**
Made from solid, impact resistant polypropylene, ideal for keeping the area clean from battery acid residue.
- **Main switch (100A current rating)**
Conveniently turn on and off all equipment connected to the battery box.
- **Carrying handles**
Designed for safe and easy carrying and prevents contact with battery acid residue.
- **Adjustable strap**
Solid strap for securing the battery box in a fixed position.
